Nested Loops

An inner loop within the repeating block of an outer loop is called Nested Loop.

The **Inner Loop** will be executed one time for each iteration of the **Outer Loop.**

Code

PYTHON

```python
for i in range(2):
  print("Outer: " + str(i))
  for j in range(2):
    print(" Inner: " + str(j))
```

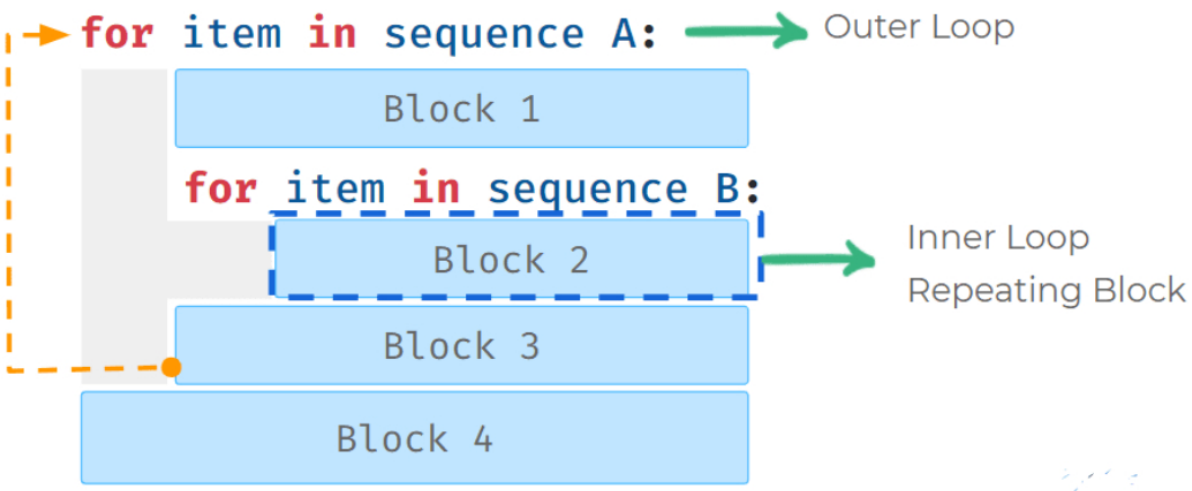

Output

```
Outer: 0
 Inner: 0
 Inner: 1
Outer: 1
 Inner: 0
 Inner: 1
```

Nested Repeating Block

Nested Repeating Block

The one highlighted in the blue dotted line is the **repeating** block of the inner loop.

Code

PYTHON

```python
for i in range(2):
  print("Outer: " + str(i))
  for j in range(2):
    print(" Inner: " + str(j))
print("END")
```

In the above example, the below line is the repeating block of the nested loop.

Code

PYTHON

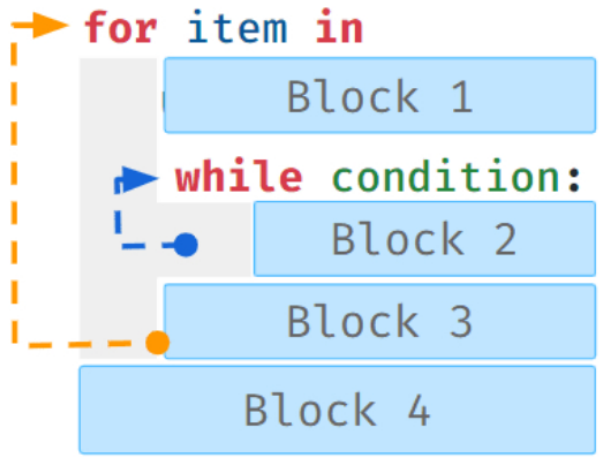

```python
print(" Inner: " + str(j))
```

Output

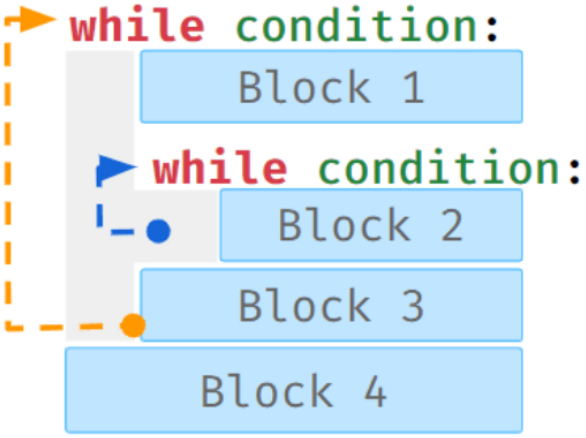

```
Outer: 0
 Inner: 0
 Inner: 1
Outer: 1
 Inner: 0
 Inner: 1
END
```
