Cheat Sheet

More Arithmetic Operators

Modulus

To find the remainder, we use Modulus operator `%`

- `a % b`

Code

```python
print(6 % 3)
```

Output

```
0
```

Code

```python
print(7 % 4)
```

Output

```
3
```

Exponent

To calculate a power b, we use Exponent Operator `**`

- `a ** b`

Code

```python
print(2 ** 4)
```

Output

```
16
```

Square of a number

We can find the square of a number using the exponent operator by keeping the exponent as **2**.

Code

```python
print(5 ** 2)
```

Output

```
25
```

Square root of a number

We can find the square root of a number using the exponent operator to calculate the square root of a number by keeping the exponent as **0.5**

Any number to the power of **0.5** we give the square root value of that number.

Code

PYTHON

```python
print(16 ** 0.5)
```

Output

```
4.0
```
