

CSS Box Properties

1. Border Width

The CSS `border-width` property specifies the width of the border for all four sides of an HTML element.

CSS

```
1 .button {  
2   border-width: 2px;  
3 }
```

The CSS Property and value pair `border-width: 0px;` removes the border of an HTML element.

⚠ Warning

Specifying the CSS `border-style` property for an HTML element is mandatory. Otherwise, the CSS properties like `border-color` , `border-width` will not appear in the browser. The HTML `button` element is an exception as it appears with a border in the browser by default.

← Question 1 of 4

Which **CSS Property** can be used to set the **border thickness** of an HTML element?

- ☐ height
- ☐ border-width
- ☐ width
- ☐ border

[Show Answer](#)[Submit](#)

2. Border Radius

The CSS `border-radius` property specifies the roundness of the corners of an HTML element.

CSS

```
1 .button {  
2   border-radius: 20px;  
3 }
```

You can use the below CSS properties to round a specific corner of an HTML element.

Property
<code>border-top-left-radius</code>
<code>border-top-right-radius</code>
<code>border-bottom-left-radius</code>
<code>border-bottom-right-radius</code>

Quick Tip

Specifying the background color for an HTML element makes the border radius more visible.

Question 1 of 2

Which **CSS Property** is used to **round** the **bottom left corner** of an HTML element?

- ☐ `left-bottom-border-radius`
- ☐ `border-bottom-left-radius`
- ☐ `border-bottom-top-radius`
- ☐ `border-bottom-right-radius`

Show Answer

Submit

3. Border Color

The CSS `border-color` property specifies the color of the border for all four sides of an HTML element.

CSS

```
1 .button {  
2   border-color: orange;  
3 }
```

⚠ Warning

Specifying the CSS `border-style` property for an HTML element is mandatory. Otherwise, the CSS properties like `border-color` , `border-width` will not appear in the browser. The HTML `button` element is an exception as it appears with a border in the browser by default.

← Question 1 of 2

Which **CSS Property** specifies the **color** for all the **four borders** of an HTML element?

- ☐ border-color
- ☐ border-width
- ☐ color
- ☐ background-color

[Show Answer](#)[Submit](#)

4. Border Style

The CSS `border-style` property specifies the style of the border for all four sides of an HTML element.

[CSS](#)

```
1 .button {  
2   border-style: dashed;  
3 }
```
