

CSS Box Properties

1. Height

The CSS `height` property specifies the height of an HTML element.

```
1 .card {  
2   height: 200px;  
3 }
```

CSS

2. Width

The CSS `width` property specifies the width of an HTML element.

```
1 .card {  
2   width: 250px;  
3 }
```

CSS

[<](#) Question 1 of 3

Which **CSS Property** specifies the **height** to an HTML element?

- ☐ height
- ☐ width
- ☐ color
- ☐ background-color

[Show Answer](#)[Submit](#)

CSS Background Properties

1. Background Image

The CSS `background-image` property specifies the background image of an HTML element.

CSS

```
1 .card {  
2   background-image: url("https://d2clawv67efefq.cloudfront.net/ccbp-static-websi  
3 }
```

Value	Description
url (URL)	The URL to the image.

Warning

1. The background image takes the height of the content of an HTML element if you don't specify the height to it.
2. The URL given to the `background-image` must be a valid URL to display the image.

2. Background Size

The CSS `background-size` property specifies the size of the background image of an HTML element.

CSS

```
1 .card {  
2   background-size: cover;  
3 }
```

Value	Description
cover	Scales the image to the smallest size while maintaining the same aspect ratio (width/height) and covers the entire width and height even if the image is cropped.

Note

Aspect Ratio is the ratio of the width and height (width/height) of an image.

Code

Output

HTML CSS JS JAVASCRIPT

```
1 <!DOCTYPE html>
```

```

2 <html>
3 <head></head>
4 <body>
5 <div class="card">
6   <h1>Tourism</h1>
7   <p>Plan your trip wherever you want to go</p>
8   <button>Get Started</button>
9 </div>
10 </body>
11 </html>

```

Viewport

The browser's **viewport** is the area of the window in which web content can be seen.

1. Viewport Height

The CSS Viewport Height **vh** Unit equals to 1% of the height of the Viewport (browser window size).

CSS

```

1 .card {
2   height: 50vh;
3 }

```

 Note

The height `100vh` sets an HTML element to the entire height of the Viewport (browser window size)

2. Viewport Width

The CSS Viewport Width `vw` Unit equals to 1% of the width of the Viewport (browser window size).

CSS

```
1 .card {  
2   width: 100vw;  
3 }
```

Note

The width `100vw` sets an HTML element to the entire width of the Viewport (browser window size).

Code

Output

HTML CSS JS JAVASCRIPT

```
1 <!DOCTYPE html>  
2 <html>  
3   <head></head>  
4   <body>  
5     <div class="card">  
6       <h1>Tourism</h1>  
7       <p>Plan your trip wherever you want to go</p>  
8       <button>Get Started</button>  
9     </div>  
10  </body>  
11 </html>
```
